

Commission Member Profile

Rob Ellis

Rob Ellis is the Director of A.J. Ventures, Inc. He founded the company with his wife in 1995 and has been actively employed with the company since 2003. A.J. Ventures, Inc., currently serves as a subsurface utility consultant specializing in utility potholing and support services for Subsurface Utility Engineering (SUE).

Rob has over 33 years of experience in civil construction. His management experience includes construction of natural gas pipeline and distribution systems and telecommunications infrastructure, as well as water, sewer, highways, bridges, dams, EPA Superfund sites, electric and cable television. Rob has been involved since the early days of SUE and modern trenchless technologies, including directional boring and non-destructive utility potholing.

Rob was nominated to serve on the Underground Damage Prevention Safety Commission by Colorado 811 to represent the interests of excavators throughout Colorado.

Rob received a B.S. in Construction Management from Colorado State University in 1986.
