

Commission Member Profile

Ted Jensen

Ted Jensen has worked for Larimer County Road and Bridge for 21 years. He started his career driving trucks and running equipment to perform maintenance. Ted then moved into management, where he supervised road grading, snow removal and ice control on approximately 90 miles of unpaved roads.

Ted currently serves as the Structures Group Manager with Larimer County Road and Bridge, where he is responsible for drainage maintenance, culvert installations and bridge maintenance. He has performed and supervised the safe excavation of many drainage and bridge projects.

Ted is also a member of Colorado Counties Inc. and the Colorado 811 Board of Directors, representing Government.

All county projects are in the right of way, which requires working within the Excavation Requirements law and coordinating with facility owners, so Ted is very familiar with the processes for which the Safety Commission oversees enforcement.
