

Commission Member Profile

Jeannette Jones

Mrs. Jones has a Bachelor of Science degree in Chemical and Petroleum Refining Engineering and a minor in Environmental Science from Colorado School of Mines. She is a senior energy and safety leader known for her extensive technical and industry regulatory expertise in the upstream and midstream business. She has a strong engineering and construction background in oil, gas, and water pipelines. Her recent experience spans management oversight of large capital projects as well as pipeline safety, compliance, and integrity roles for Midstream oil and gas companies. She is a strong advocate for industry and communities to work together for pipeline safety.

Mrs. Jones has worked on numerous pipeline safety and rulemaking efforts at the federal, state, and local levels, including Pipelines and Informed Planning Alliance with Pipelines and Hazardous Material Safety Administration, COGCC Flowline Rulemaking, and Weld County Commission's Use by Special Review/ LAP Permit Process.

Mrs. Jones brings a passion for safety and early stakeholder engagement - a critical skillset that will build a strong foundation for the rapid population and oil and gas growth in Colorado's immediate future.
